

The STD/HIV Prevention Training Center at Johns Hopkins

Affordable clinical training for healthcare providers in the public and private sectors who offer sexual and reproductive health services.

The STD/HIV Prevention Training Center at Johns Hopkins is part of the **National Network of STD Clinical Prevention Training Centers**. Our service area includes Delaware, the District of Columbia, Kentucky, Maryland, Pennsylvania, Virginia, West Virginia, and Tennessee.

We offer a variety of courses, including

- STD Intensive Courses
- Brightfield and Darkfield Microscopy
- Lab Methods Training
- Patient Exam classes
- Webinars

...and more. We can also bring trainings directly to providers in our service area when need and demand merits as well as design specialized training to address emerging needs.

Primary Faculty

- Johns Hopkins Medical Institutions
- Baltimore City Health Department

Additional Faculty

- Drexel University School of Medicine
- Penn Presbyterian Medical Center
- Virginia Commonwealth School of Medicine
- University of Maryland at Baltimore City
- Delaware Division of Public Health
- District of Columbia Department of Health
- Philadelphia Department of Public Health
- Tennessee Department of Health
- Virginia Department of Health
- Other university systems and private consultants

Multi-Day Courses—STDs

STD Intensive (Three days or Five days) **CE** **\$**

This course is open to clinicians offering STI services. The **five-day course** includes: one day of experiential training in laboratory techniques; one clinical day with a preceptor; and hands-on training in a directed sexual/reproductive health examination by genital teaching associates. The **three-day course** includes didactic presentations on various STI, HIV and emerging topics.

STI Overview (Three days) **CE**

This course, offered to staff that see clients who may have an STI in various settings, has didactic as well as discussion with participants. The target audience is nurses, social workers, outreach workers, health aides, phlebotomists, clerical and administration.

Laboratory

Brightfield Microscopy (One day) **CE** **\$**

This one-day course is offered to clinicians to assist them in identifying wet mounts (BV, candidiasis and trichomonas) under a microscope correctly. This is taught by our lab consultant. *Class size is limited to 10 participants.*

Darkfield Microscopy (Four hours) **CE** **\$**

Open to clinicians, medical technicians and others who are responsible for performing Darkfield Microscopy. Participants will be required to accurately identify *Treponema pallidum* under a dark field using accepted microscopy techniques. *Class size is limited to 10 participants.*

Lab Methods Training Class (One day) **CE** **\$**

This training will introduce Brightfield and Darkfield Microscopy and assist clinicians in making better diagnoses for their patients. A lab consultant will assist participants in properly identifying unknown specimens. This course will enhance the skills of providers who do this diagnostic already.

POCT Training (One day) **CE**

This course introduces POCTs for STDs, demonstrates how selected POCTs for STDs are performed, and has participants identify various unknowns correctly, using selected POCTs under laboratory supervision.

Extra Genital Training Course (One day) **CE**

This course reviews the various tests available for extra genital screening for gonorrhea and chlamydia by provider as well as by patient.

CE Continuing education is available

\$ There is a fee for this course

 There may be a fee associated with this course

FREE There is no charge this course

Patient Exam Courses

Patient Exam Course (One day) **CE** **\$**

This one-day course is offered to NPs and PA students to learn how to do a good STD clinical examination on male and female patients. Includes hands-on examination experience with live models didactic presentations by experienced faculty. *Class size is limited to 10 participants in person.*

Male Examination Course (Two-three hours) **CE** **\$**

This course is offered to NPs or PAs that need experience in doing a good male STD clinical exam. This includes hands-on examination experience with live models didactic presentations by experienced faculty. *Class size is limited to 10 participants in person.*

STD and HIV Short Courses

STI Update (One day) **CE** **FREE**

Offers training in clinical care, medical management and diagnosis, behavioral techniques and partner management activities to clinical health care providers, utilizing didactic methods, presenting the most current information, and implementing research findings regarding STIs.

STD/HIV Update—Short Course **CE** **FREE**

This update on STDs and HIV for healthcare workers can be a 1-4 hour program. Topics available: STI Update, Syphilis Update, GC/CT Update, Sexual Health Assessment, STD Treatment Guidelines.

PrEP Update (One day) **CE** **FREE**

Topics covered: CDC PrEP Guidelines, Major PrEP studies, PrEP MSM and Adolescents, PrEP and Women, STIs and Extra genital Screening, Patient Adherence, Risk Reduction, Paying for PrEP, and Sexual History Taking. CE is available and we can bring the training to your agency.

What's New (One day) **CE** **FREE**

This one-day conference will focus on the integration efforts that support a collaborative healthcare approach. Current medical updates in services for STIs, HIV, TB, hepatitis, family planning, and addictions will be discussed. Experts in the field will discuss what is new in that specialty.
